

Barrango

Green Foliage

Barrango greenery is some of the most rich and lush you will find available. We use a thicker than industry average green UV resistant PVC for our foliage. Our in-house machinery cuts, winds and spins the PVC into long strands which are then fashioned into Christmas trees, wreaths, sprays or garlands. We custom manufacture different styles of foliage: **Mountain Pine**, our classic most natural look; **Sierra Pine**, our tight woven topiary style; **Ponderosa Pine**, a long needle pine style foliage; and our custom **Canadian Pine**, used mainly for our spectacular Light Show Feature Trees.

All of Barrango Giant Christmas trees are made with a solid steel framework with individual branches that hook onto the frame and come straight out. Using our Mountain Pine branches, we can create a truly realistic looking tree with alternating branch lengths, creating natural looking spaces throughout the tree for larger ornamentation. Or with our Canadian Pine branches, we create a uniform branch that helps to evenly spread out all the RGB pixel lights throughout the tree, generating a fully motion graphics capable lightshow set up.

Don't forget that every tree, garland, spray, or wreath as well as all our décor are made in the USA. Our staff will make sure your items are packaged and delivered safe and secure so everything arrives intact. We'll be with you every step of the way to make sure that installation and breakdown of your display goes smoothly.

Remember that Barrango can customize your décor and display to virtually any vision you might have. Our options are expansive but if you don't see what you're looking for please call us to discuss. Our goal is to give our customers the very best experience as well as a visually memorable display that resonates with your customer.
