

# Barrango

## Natural Manzanita

Barrango is proud to be an exclusive designer incorporating Manzanita in commercial decor. Manzanita is a wild shrub that grows naturally in high altitudes in Southern California. We harvest ours from the Sierra Nevada Mountains in a location called Barrango Canyon. Even though Manzanita is strong, its flexibility makes its branches a perfect medium for design. Branches are shaped into bowls and hand-crafted by one of our artisans. This allows the Manzanita to be molded into virtually any shape and creates the Barrango signature look. Although we can paint Manzanita in a variety of colors including gold, silver, and black, most clients choose white to evoke a Winter Wonderland feel to their display.

And you'll see the way we've fashioned Manzanita into eye-catching, wall decor. We've created a selection of trees, pineapples, birds, snow globes, stars and even pinballs or coasters. We also can create scenes in multiple sizes and with a wide line between the top, bottom, left and right display. Most popular is our deer which can be posed grazing, leaping or standing and is perfect for use for sale.

Don't forget that every tree, wreath, deer and snow globe as well as all decor are 100% made in the USA. Our staff will make sure your items are packaged and delivered safe and secure so everything arrives intact. We'll be with you every step of the way to make sure that installation and breakdown of your display goes smoothly.

Remember that Barrango can customize your decor and display to virtually any vision you might have. Our options are extensive but if you don't see what you're looking for please call us to discuss. Our goal is to give our customers the very best experience as well as a visually memorable display that resonates with your customer.
