

Barrango

Natural Manzanita

Barrango is thrilled to be an exclusive designer incorporating Manzanita in commercial décor. Manzanita is a wild shrub that grows heavily in high altitudes in Northern California. We harvest ours from the Sierra Nevada Mountains at a location actually called Barrango Lane! Even though Manzanita is strong, its flexibility makes the branches a perfect medium for décor. Branches are attached to steel wire frames welded by one of our artisans. This allows the Manzanita to be molded into virtually any shape and creates the Barrango signature look. Although we can paint Manzanita in a variety of colors including gold, silver or copper, most clients choose white to evoke a Winter Wonderland feel to their display.

Ahead you'll see the many ways we've fashioned Manzanita into eye-catching, artistic décor. We've created a selection of trees, garland, wreaths, snow balls, stars and even gazebos or castles. We also can create swans in multiple sizes and with a water line base so they can actually float in your wet display. Most popular is our deer which can be posed prancing, jumping or standing and be made up to 25 feet tall!

Don't forget that every tree, wreath, deer and snow ball as well as all décor are 100% made in the USA. Our staff will make sure your items are packaged and delivered safe and secure so everything arrives intact. We'll be with you every step of the way to make sure that installation and breakdown of your display goes smoothly.

Remember that Barrango can customize your décor and display to virtually any vision you might have. Our options are expansive but if you don't see what you're looking for please call us to discuss. Our goal is to give our customers the very best experience as well as a visually memorable display that resonates with your customer.
