

Barrango

Natural Manzanita

Barrango is thrilled to be an exclusive designer incorporating Manzanita in commercial decor. Manzanita is a wild shrub that grows heavily in high altitudes in Northern California. We harvest ours from the Sierra Nevada Mountains at a location actually called Barrango Lane! Even though Manzanita is strong, its flexibility makes the branches a perfect medium for decor. Branches are attached to steel wire frames welded by one of our artisans. This allows the Manzanita to be molded into virtually any shape and creates the Barrango signature look. Although we can plant Manzanita in a variety of colors including gold, silver or copper, most clients choose white to make a Winter Wonderland feel as their display.

And you'll see the many ways we've featured Manzanita into eye-catching, artistic decor. We've created a selection of trees, general wreaths, snow balls, stars and even garlands or noels. We can even create signs of multiple sizes and with a laser the base so they can actually float in your wet display. Most people like to have them for posed printing, gifting or hanging and be made up to 25 feet tall!

Don't forget that every tree, wreath, star and snow ball as well as all decor are 100% made in the USA. Our staff will make sure your items are packaged and delivered safe and return to everything arrives intact. We'll be with you every step of the way to make sure that installation and breakdown of your display goes smoothly.

Remember that Barrango can customize your decor and display to virtually any vision you might have. Our options are extensive but if you don't see what you're looking for please call us to discuss. Our goal is to give our customers the very best experience as well as a casually memorable display that resonates with your customer.
