

## Manzanita Super Nova

Control by remote, our Manzanita Super Nova is a 10' Starburst, perfect for the top of a Manzanita tree. The branches are made of a flexible PVC material and are 100% weather-resistant. The light show effects, flashing colors, and on and off capabilities, are all done through a remote control. The remote lights are included. They can even be used to control or flash lights to create an exciting outdoor display.
